Proud to perform

Discover Intelligent Machine Control

Komatsu
Komatsu is committed to improve your machines – today and in the future. Its revolutionary intelligent Machine Control took the industry by storm in 2013 and has become a proven technology and a market leader for customers around the world.

**Make the intelligent choice.**

*Intelligent Machine Control is being recognised as a game changer in how job sites are managed. The industry will never be the same again.*

Mal McCoy - Product Manager, Komatsu Europe
AUTOMATIC DOZING

With every job, Komatsu intelligent dozing saves you time and money. The automatic control mode boosts productivity in every stage of the process, either when moving thousands of cubic meters of material or for fine grading the last 2 cm.

Because every pass counts!

“Komatsu succeeded in retaining the world-class performance of their well-known dozers on cleaner and more efficient machines, while steadily improving their service to customers.”

Cedric Grajewski - Jobsite Manager, Terrassements Derrey
With your Komatsu intelligent excavator even the most difficult jobs become easy. The Semi-Automatic mode lets you work independently, with consistent accuracy and up to 30% faster.

Filling a bucket will never be the same.

“Our Komatsu intelligent excavator fulfils its promises. And beyond a huge increase in efficiency, it also improves our company’s image.”

Olivier Hanon - CEO, Duffroy S.A.R.L.
AT A GLANCE

• FACTORY INSTALLED 3D MACHINE CONTROL SYSTEM
  • INTEGRATED GNSS ANTENNAE
  • STROKE SENSING HYDRAULIC CYLINDERS
  • TOUCH SCREEN CONTROL BOX
  • SELECTABLE WORKING MODES
  • AUTOMATIC REAL TIME DIGGING CONTROL

• POWERFUL AND ENVIRONMENTALLY FRIENDLY EU STAGE IV ENGINE

• KOMATSU CARE™ MAINTENANCE PROGRAM FOR KOMATSU CUSTOMERS

• KOMTRAX — STATE-OF-THE-ART WIRELESS MONITORING
With intelligent Machine Control, there’s no need for ground staff to check actual surface levels. By reducing the number of workers in the area around the machine, jobsite safety is drastically improved.

Thanks to KOMTRAX, detailed usage reports can be created, which enable you to accurately assess operating costs and best plan your jobsites.
The Komatsu Auto Tilt Bucket (ATB) is the only bucket on the market that can be tilted during semi-automatic grading. You can monitor all its movements in real time, with no lag or delay, for more efficiency and more flexibility on the jobsite.

Find out how easy “difficult” can be.
Your Komatsu Distributor is part of a worldwide network committed to provide quality support and service. It’s also your single point of contact for expert knowledge about your jobsites and the Komatsu intelligent Machine Control inside your machine.

Intelligent support is just one phone call away.
OUR ADVANTAGE

iNTELLIGENT MACHINE CONTROL

“Komatsu intelligent Machine Control connects humans and machines through its new innovative network technology.

This cutting-edge technology takes the construction machine industry to the next level.

We are proud to be part of it.“
